

次世代太陽能電池與氫能技術之永續能源應用研討會

Date: November 5, 2016(Thursday)

Time: 09:00-15:00

Venue: National Chung Hsing University, Applied Science and Technology Building B1 International conference hall (應用科技大樓 B1 國際會議廳)

Time	Speaker	Affiliation	Talk Title
09:00-09:05	Opening Remarks		
09:05-09:25	Dr. Matyas Daboczi	HUN-REN Centre for Energy Research (Hungary)	Monolithic Photoanodes of PTQ10: L8-BO with Improved Stability for Solar Water Oxidation and Enhanced Unassisted Water Splitting
09:25-09:45	Dr. Tzu-Chien Wei	National Tsing Hua University (Taiwan)	
09:45-10:05	Dr. Martyn A McLachlan	Imperial College London (UK)	Vacancy-ordered double-perovskite-based memristors for image processing and pattern recognition
10:05-10:25	Dr. Thomas Anthopoulos	Imperial College London (UK)	One-Step Formation of 2D/3D Perovskite Heterojunction via Ligand Intercalation and Facet Engineering for Efficient Perovskite Solar Cells
10:25-10:55	Coffee Break		
10:55-11:15	Dr. Yue Hu	University of Edinburgh (UK)	In-Depth Review of Multiphysics and Circuit Simulation Approaches for Perovskite Solar Cells
11:15-11:35	Dr. Tom Macdonald	University College London (UK)	Research Data supporting "Unveiling the Role of Guanidinium for Enhanced Charge Extraction in Inverted Perovskite Solar Cells"
11:35-11:55	Dr. Jaemin Kong	Gyeongsang National University (Korea)	Machine-learning-guided high-throughput design of asymmetric A-DA' D-A acceptors toward efficient organic solar cells
11:55-12:15	Dr. Ji Seon Kim	University of Oxford (UK)	Don't fluorinate there! The impact of fluorination position on polymer photostability and its effect on photovoltaic device stability
12:15-12:35	Dr. Shun-Wei Liu	Ming Chi University of Technology (Taiwan)	

12:35-13:35	Lunch Break		
13:35-13:55	Dr. James Robert Durrant	University of Oxford (UK)	Research Data supporting "Unveiling the Role of Guanidinium for Enhanced Charge Extraction in Inverted Perovskite Solar Cells"
13:55-14:15	Dr. Hyo Jung Cha	Kyungpook National University (Korea)	Design strategies, methods, and photophysical insights in polymeric photocatalysts for solar-driven hydrogen evolution
14:15-14:35	Dr. Ludmilla Steier	University of Oxford (UK)	Photoswitchable isomers to improve grain boundary resilience and perovskite solar cells stability under light cycling
14:35-14:55	Dr. Jinho Lee	Incheon National University ResearchGate (Korea)	Chemically Passivated Polymeric Charge Recombination Layer for Efficient Tandem Organic Solar Cells
14:55-15:00	Closing Discussion / Group Photo
